Metis Operator SOP - Install, Run, Test, Deploy

Document: METIS-SOP-OPS-4.5.0

Date: 2026-08-08

Version: 4.5.0

Standard: NASA NAI 1450.3 memorandum layout

Reply to Attn of: <https://github.com/f00-sh/metis>

TO: Metis operators and coding agents

FROM: Metis documentation pack

SUBJECT: Standard operating procedures for Metis 4.5.0

1. Purpose

This SOP defines how to install Metis, run smoke checks, execute tests, load symbols, and deploy the public site. Product version is 4.5.0.

2. Preconditions

- SBCL 2.x and Quicklisp on PATH (or install script will use system SBCL)
- Optional: curl/git for remote install
- Optional: Cloudflare Wrangler credentials for site deploy

3. Install

Run: `curl -fsSL https://metis.f00.sh/install.sh | bash`

Or pin: `curl -fsSL https://metis.f00.sh/install.sh | METIS_VERSION=4.5.0 bash`

Or from checkout: `./scripts/install.sh`

Or: `brew install f00-sh/tap/metis`

Confirm: metis version prints 4.5.0

4. Run and smoke

Start TUI: `metis`

Or line chat: metis chat

Check help: metis help

Symbol CLI: metis symbol help

Exit TUI with /quit

5. Test gate

From checkout: ./bin/memis test

Targeted: fiveam suite :metis-install after install-doc changes

Do not ship if suite fails

6. Symbols

Train kit: metis symbol train knowledge/source-kits/<id>

Build seal: metis symbol build knowledge/source-kits/<id>

Verify: metis symbol verify knowledge/sealed/<id>

Load: metis symbol load knowledge/sealed/<id>

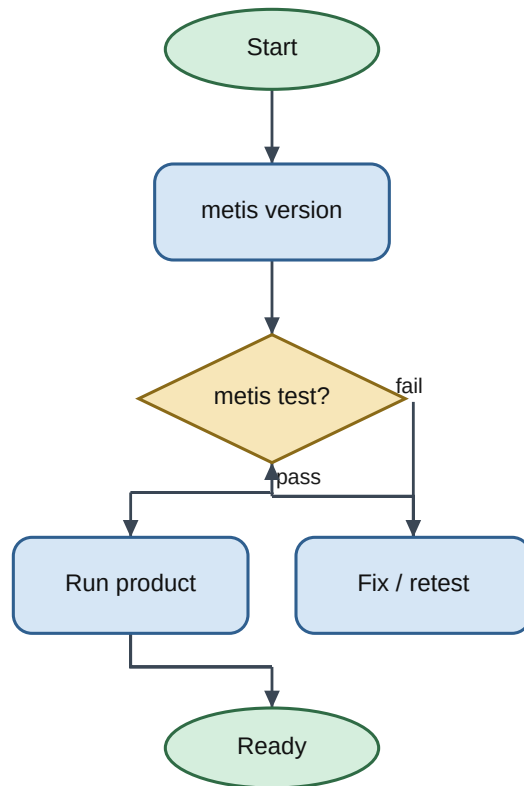

7. Site deploy

Update site/ content and wrangler.toml if needed

Push main (CI pages.yml) or: npx wrangler pages deploy site --project-name=f00-memis
--branch=main

Fetch <https://metis.f00.sh/> and confirm version string

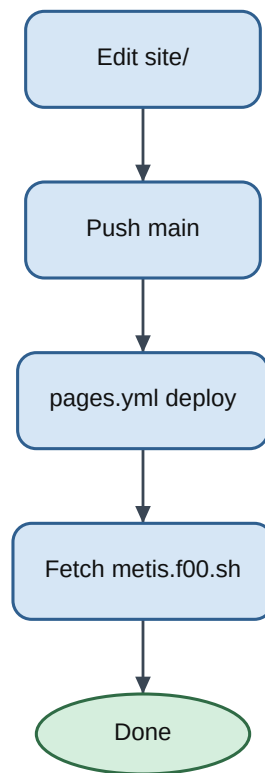

Figure 1. Operator day gate

8. Release deploy flow

See docs/sop-site-deploy.md for credentials and manual wrangler path.

Figure 2. Site publish
